Digital Economy and Society Index

European Commission, Digital Scoreboard

Main source for statistics on *digital transformation*

Which EU Country has the highest % of citizens with at least basic digital skills?

2a1 At least Basic Digital Skills All Individuals (aged 16-74)

2a2 Above basic digital skills All Individuals (aged 16-74)

What is the highest % of people who have never used the Internet?

3a1 People who never used the internet All Individuals (aged 16-74)

SUPPORT THE

OF EUROPEANS WITH
INSUFFICIENT DIGITAL
SKILLS

PRIORITY

Our focus is to support Europeans who have an insufficient level of digital skills. This means they have less chances to find work, to use online services, to have a better quality of life, to be included in today's society.

We believe that every European should be able to exploit the benefits and opportunities created by digital transformation.

MISSION

Our mission is to empower our member organisations representing non-formal education providers to support millions of Europeans to succeed in the digital transformation by providing them with training and advice.

DIGITAL COMPETENCES DEVELOPMENT SYSTEM

Research on basic digital skills

The main objective of the project is to develop an integrated modular system, the “Digital Competences Development System - DCDS” and use it to develop basic digital and transversal competences of low-skilled adults in five European countries (Greece, Latvia, Italy, Romania and Spain).

European Digital Competence Framework for all citizens

Which of these factors impact most on an individual's level of digital competence?

- 1st | Level of education
- 2nd | Age
- 3rd | Employment status
- 4th | Gender
- 5th | Geographical location
- 6th | Civil condition

EMPLOYMENT
UNEMPLOYED
Old and new forms of unemployment often depend on the lack of digital skills and adequate training for upskilling

EDUCATION

LOW-SKILLED PEOPLE

A lower level of education and qualification usually includes a low digital competence and a higher risk of social exclusion

AGE

SENIORS

Although also younger generations need to be trained on specific basic digital skills (eg. security), the majority of the seniors do not have enough skills in the digital domain

Results from the DCDS research

What are the main motivating factors for improving one's digital skills?

0

Professional situation

0

Personal interests

0

Civic participation

0

Leisure and entertainment

0

Parental role and supervision

0

Private and commercial services

0

Sense of inadequacy

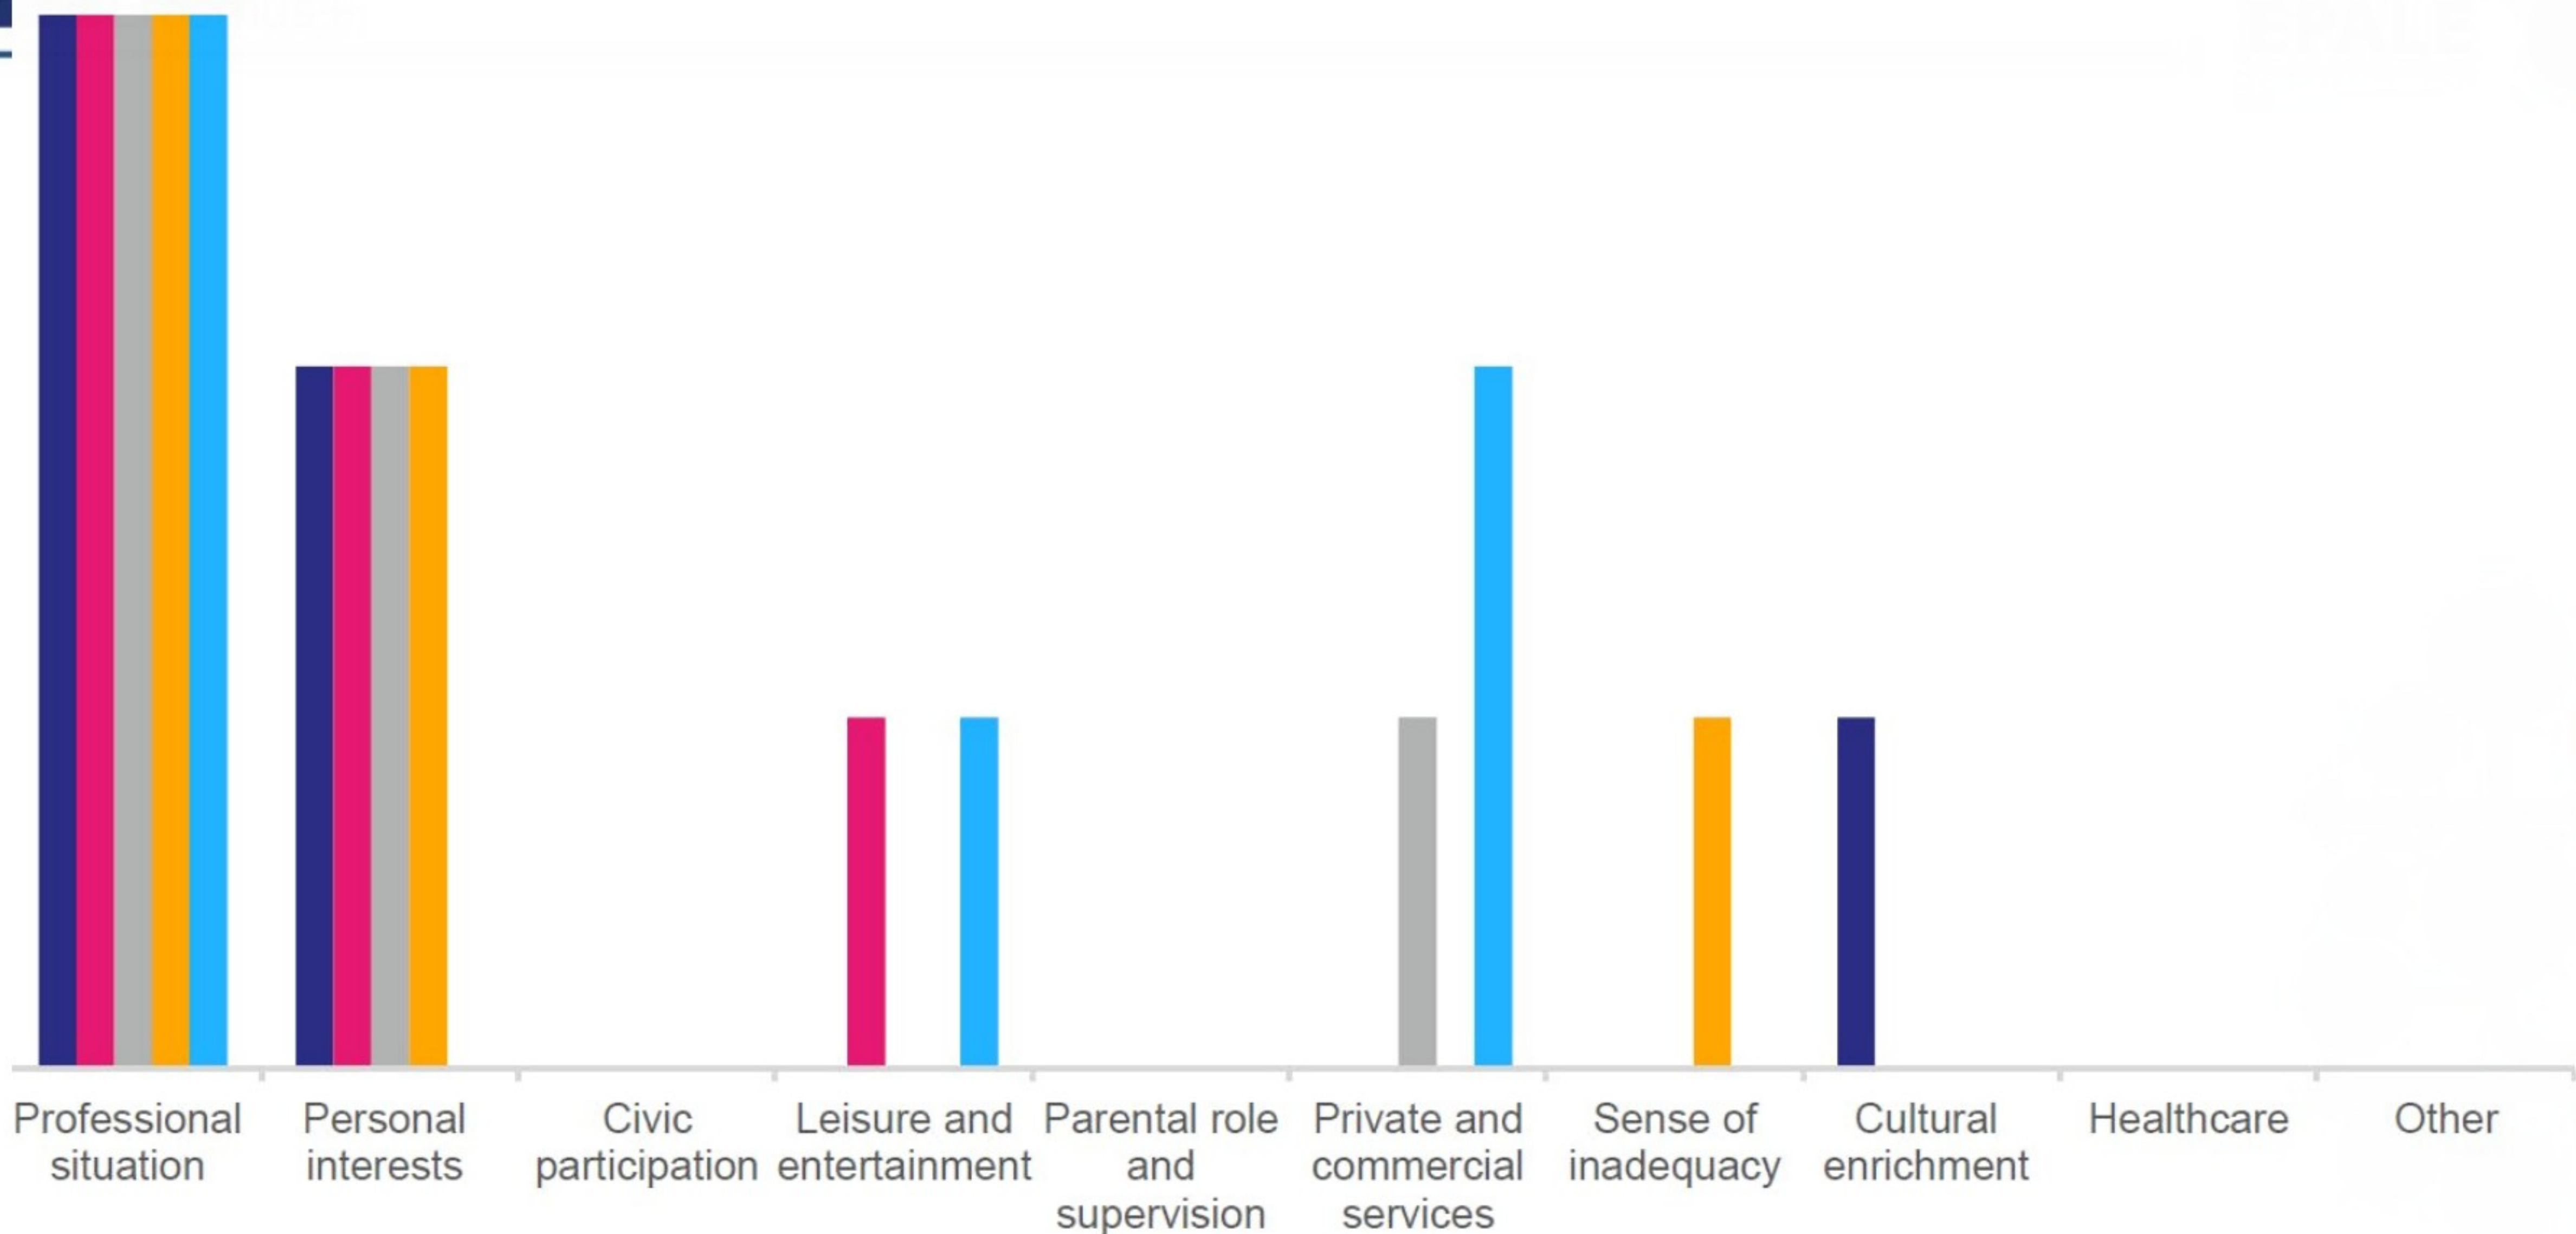

0

Cultural enrichment

MANIFESTO

for enhancing
digital competences
across Europe

MORE INFORMATION ON
www.all-digital.org

MANIFESTO

- Improved citizenship is the primary aim of developing digital competences.
- Supporting citizens to enhance their digital competences should be done with the purpose to include them in modern societies that undergo digital transformation. No citizen should feel excluded
- Read and endorse at <https://all-digital.org/manifesto/>

IMPROVING AND EXTENDING THE EDUCATIONAL OFFERING

- Applying a **modular approach** to digital curriculum creation and design to improve and increase customisation of content and delivery.
- Encouraging the **co-design of curricula** and courses with stakeholders from different sectors to ensure rapid adaptation to changing needs of the audience, technology and context.
- Guaranteeing the presence of **qualified personnel**, able to develop and update self-training courses in order to select tools and methods suited to the context and possibilities of the institution.

ENSURING WIDER ACCESS TO TRAINING AND EDUCATION PATHWAYS

- Diversifying the **modes of delivery** (online, face-to-face, blended, or a combination of these)
- Exploiting the possibilities offered by technological innovations so as to ensure **access for all**, anywhere, anytime, regardless of device
- Paying particular attention to **groups at risk of exclusion** and to the physical, cognitive, emotional and cultural obstacles

RAISING THE LEVEL OF QUALITY OF PATHWAYS

- Taking advantage of the **European reference frameworks** (such as DigComp, DigCompEdu, e-CF etc.)
- Basing instructional design on concrete **Learning Outcomes** to describe what the learner will have learned, what he/she will be able to do
- Using the **EU-recognised competence recognition tools** (Europass, ECVET, ESCO) also in order to facilitate people's mobility.

CONTRIBUTING TO THE DEVELOPMENT OF A HOMOGENEOUS VALIDATION SYSTEM AT EUROPEAN LEVEL

- Adopting and promoting the use of **DigComp** to establish a European digital skills classification and contribute to the mapping of all certifications.
- Promoting the **integration of formal and non-formal** training, testing and consolidating practices for the assessment and certification of competences
- Introducing **new certification mechanisms** based on OpenBadges and other protocols, also benefiting from the innovations that will result from AI

ACTING IN ACCORDANCE WITH THE PRINCIPLES OF SUSTAINABLE DEVELOPMENT

- Promoting initiatives aimed at encouraging citizens to improve their digital skills, including **ethics and sustainability**, through courses or ODRs
- **Valuing the results** obtained by sharing them as much as possible with consortium members and all those who share the same needs and objectives.
- Highlighting digital innovation practices that respond to the **challenges of the society** of today and that of the near future,

COMMUNITIES OF PRACTICE

ALL DIGITAL hosts two Communities of Practice (CoP): **DigComp CoP** and **Certification CoP**.

By joining you have the opportunity to raise the issues that concern you, voice your opinion in discussions, participate in working groups, exchange materials and experience, access good practices, learn from peers, share resources and be informed about the latest developments concerning the CoP topic. Communities of Practice are open to everyone, individuals and organizations alike.
